**LeapSpace**

Welcome to LeapSpace™

The AI-assisted workspace to *accelerate research and discovery*

LeapSpace is Elsevier's next-generation AI-assisted research workspace, designed with the academic community to help researchers move faster from ideation to impact while safeguarding research integrity, transparency, and trust.

AI is transforming how research is conducted, reviewed, and shared. At the same time, researchers and institutions face growing pressure to adopt AI responsibly — without compromising rigor, provenance, or academic values.

LeapSpace provides a research-grade alternative.

Built specifically for academic research, it delivers publisher-neutral, research-grade insights across the research workflow, augmenting — not replacing — human judgment.

What makes LeapSpace different

Research-grade AI: Built on trusted, peer-reviewed scholarly content with transparent citations and confidence signals.

Transparency and explainability: Clear references and visible reasoning steps support verification and trust.

Publisher-neutral insights: Independent governance ensures relevance-driven results without preferential treatment.

Human-in-the-loop by design: Supports critical thinking and creativity while keeping human judgment central.

Enterprise-ready: Developed in line with Elsevier's Responsible AI Principles, with enterprise-grade privacy and security.

Explore LeapSpace for your research or institution.
