TEMPLATE

* The measurements shown may vary slightly depending on the brand. The measurements in the template are in mm. The ring sizes indicated reflect EU sizes.

THERE ARE TWO WAYS TO DETERMINE YOUR RING SIZE

1. Fold along the dotted line to cut out a semicircle. The resulting cut-out can now be used to determine your ring size. The cut-out should fit snugly around your finger.
2. If you already have a ring in the appropriate size, simply place the ring on the matching circle. Make sure that the inner circumference is flush with the outer edge of the circle.
