

Cut costs and build logistics resilience

with the Celonis Logistics Suite

Rising costs. Tariffs. AI.

In a world of rapid change, it's becoming ever more difficult to ensure the efficient transportation of goods while making the most of new opportunities.

Logistics networks are changing making them harder to manage and improve

\$12.8_T

The amount that businesses spent on logistics in 2024 — \$330 billion more than in 2023.
(Source: Cargo Newswire)

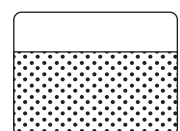

\$707.75_B

The value that the global AI logistics market is anticipated to reach by 2034.
(Source: Natwest)

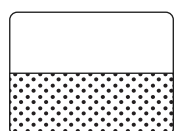

2.65_M

The number of TEUs delayed as of March 2025 due to ongoing port congestion.
(Source: PWC)

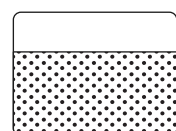

68%

The percentage of major ports that saw increased average anchor times in 2024.
(Source: Beacon)

52%

The reduction in TEU volume passing through the Suez Canal since the end of 2023.
(Precedence Research)

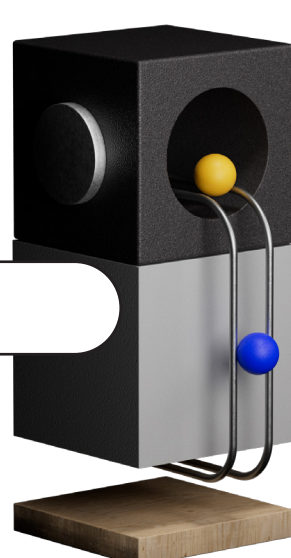

67%

The share of the globe that delivery drones could reach by 2034.

Enter Celonis for Logistics

Powered by Process Intelligence, Celonis gives you a comprehensive view of your logistics network, identifying value opportunities to help you **contain costs, implement new technologies, and build resilience.**

[Watch the demo](#)

Go beyond your ERP and TMS systems

For a resilient logistics network, optimized processes are crucial. The **Celonis Logistics Suite** combines process data, business context, and connectors to your systems to give you the visibility you need.

Through insights into your processes, it helps you quickly find **opportunities for value** throughout your logistics network, including in Demurrage and Detention and in Load Consolidation.

Celonis for Load Consolidation

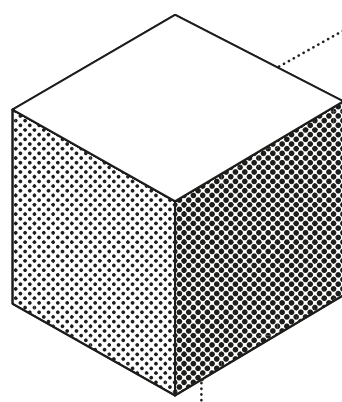

Extract data from TMS and ERP systems to:

- ✓ Recommend load consolidation opportunities
- ✓ Realize cost savings with adjustment to shipments
- ✓ Highlight areas of improvement in your network

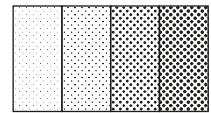

Celonis for Demurrage and Detention

Leverage transactional and freight visibility data to:

- ✓ Prioritize shipments to prevent fees
- ✓ Validate charges and detect recurring disputes
- ✓ Identify ports with long cycle times and take action

What could you achieve with Celonis?

\$3.84_M

The cost savings identified by an **auto supplier**, using the Celonis Logistics Suite to prevent detention fees.
