

# Accelerate your time to value. Meet the Celonis Starter Kit.

The Celonis Starter Kit helps you identify and frame the most valuable improvement opportunities fast with four key assets:

## Knowledge Model

Serves as central source of process knowledge - KPIs, inefficiencies, and best practices

## Validation Cockpit

Enables rapid validation of the inputs and data by relevant stakeholders for specific use cases

## Process Cockpit

Assesses performance against common use cases and surfaces high impact inefficiencies

## Value Discovery App

Quantifies the potential value Celonis can drive across all the use cases for a process

Our purpose-built tools get your teams up and running as quickly and easily as possible

---

### Experience

Informed and backed by thousands of customer implementations

### Ease

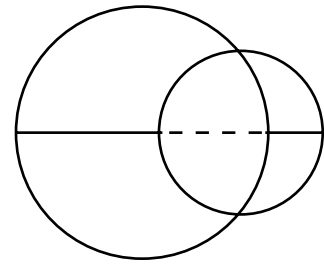

Set up for quick and easy implementation with out-of-the-box analyses

### Efficacy

Enables stakeholder confidence in use case selection and go-forward action

# A guide to a focused value journey

The Celonis Starter Kit always centers on value. We help you prioritize and drive performance improvement in the most powerful Celonis use cases across 5 core processes.

PLATFORM

## Process X-Ray and Knowledge Layer
