

Celonis Execution Management System

To make your SAP S/4HANA Migration a success!

Your Challenges – typical risks for your migration

- Difficult alignment of IT and Business during the S/4 HANA migration process
- Limited understanding of process problems
- High operational risk associated with the migration to S/4 HANA
- Expenses and resource-intensive S/4 HANA
- Adding additional requirements during migration due to lack of ECC transparency

Our Solution – Data-driven SAP S/4HANA Migrations powered by Celonis

Celonis supports you on each stage of an S/4HANA transformation project

Pre-Transformation

Standardize and harmonize processes

Build a quantitative business case

Simulate business impact of transformation

During Transformation

Automate process documentation

Execute an objective Fit-Gap Analysis

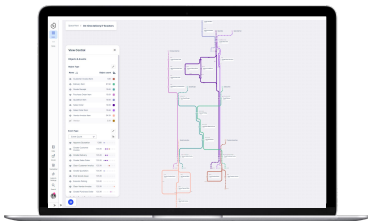

Understand the level and value of current system customization

Post-Transformation

Monitor user adoption

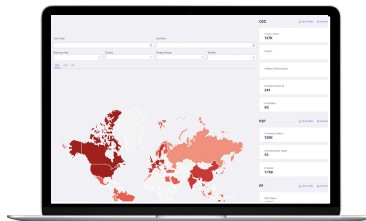

Measure business performance after the transformation

Build the foundation for continuous business improvement
