

PRODUCT DESCRIPTION:

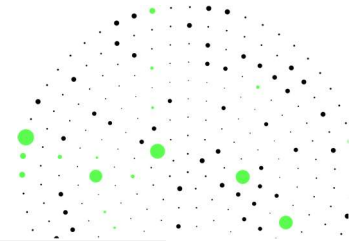

## Celonis Digital Consulting Platform

The Celonis Digital Consulting Platform enables You to utilize the Celonis Execution Management System, and thus to see how Your client’s business process are being executed.

### 1. Feature Overview

FEATURE	DESCRIPTION
NAMED USER	A Named User describes a personalized password protected account for access to the Celonis Digital Consulting Platform. A Named User may only be used by one single natural person designated by name. Any Named User having access to the Celonis Digital Consulting Platform can purchase Process Blocks for the specific consulting projects of that Named User. A Named User Subscription covers access to a Celonis demo environment and the Celonis Online Training including the Celonis Sales Professional, Analyst and Data Engineer certifications.
PROCESS BLOCK	<p>Process Blocks enable the User to analyze Your client’s business processes utilizing the Celonis Execution Management System. One Process Block enables the User to analyze one Named Process at a specific client over three (3) months. A named process implies that it cannot be switched during the subscription term of three (3) months. A Process Block incorporates all functionalities of the Celonis Execution Management System as described in the product description of Celonis Execution Management System except the Transformation Center. A Process Block covers an unlimited number of viewer access within the purchasing consultancy.</p> <p>To activate or prolong a Process Block You need to hold a valid User Subscription to the Celonis Digital Consulting Platform.</p> <p>We provide You with a data volume that is large enough to cover the reasonable needs for the analyses of Your client's business processes up to 256 GB per Process Block.</p>
PROJECT ENVIRONMENT	A user can request a Project Environment for client projects via the Celonis Digital Consulting Platform, which will be associated to the Company to

	<p>which the User is related to. According to the User’s needs, one or more Process Blocks can be stacked to constitute a Project Environment. For instance, a Project Environment for a specific client can contain two (2) Process Blocks to analyze two (2) processes over three (3) months. Upon expiration of the associated Process Blocks, the Project Environment will be archived. The uploaded customer data will be retained for four (4) weeks and deleted after this initial retainment period. Upon request, this period can be prolonged. Upon activation of a new Process Block, an archived Project Environment can be reactivated.</p>
DATA VOLUME	<p>We provide you with a Data Volume that is large enough to cover the reasonable needs for the analyses of Your client’s business processes up to 256 GB per Process Block.</p>
ENABLEMENT MATERIAL	<p>The Digital Consulting Platform provides access to a range of Enablement Material, e.g. technical trainings and sales material, that may be shared with clients.</p>

## 2. System Requirements

The User can access the Digital Consulting Platform by using a standard, up-to-date web browser on the User’s personal computer, mobile, or tablet. For logging into the Digital Consulting Platform, internet access is required.
