

## PRODUCT DESCRIPTION:

# Celonis Snap and Celonis Snap+

Celonis Snap and Celonis Snap+ are running on the Celonis Execution Management System (EMS).

The EMS is a platform built to achieve execution capacity breakthroughs. It helps businesses increase execution capacity in the four primary business areas of their enterprises: Customers, Finance & Administration, Supply & Distribution, and Products & Services.

### **Team management**

Team Management is a set of capabilities and administrative controls that allow team owners to manage all aspects of their teams, including user access & permissions, role configurations, and security & privacy settings.

### **Event Collection**

Event Collection connects to a multitude of source systems to capture events in the form of digital footprints. Furthermore, it allows users to transform the extracted data and to create a data model. The data pipeline can be orchestrated and automated through a user interface.

### **Process Connector**

The Process Connector is the combination of extracting, connecting and transforming data for one source system.

### **Process Repository**

An integrated and centralized environment for documenting and maintaining business processes. Allows the visualization of process models, the creation of a folder structure and the integration with the Conformance Checker or third party BPMN solutions.

### **Quickstarts**

A simplified Process Connector which allows you to take a first glance at your process information. A Quickstart includes the source data definition, typically a file upload, an included data transformation and a first glance analysis which is generated automatically.

## **Core Mining Engine**

The Core Mining Engine is a patented, in-memory engine that leverages process mining to measure execution capacity and sense execution gaps. It works with business logic or machine learning to sense gaps that have the biggest impact on execution capacity and triggers actions in the Automation Engine.

## **Analysis**

Analyses are responsible for helping analysts identify and measure execution gaps. To do so, an analysis offers several analytical functionalities and component visualizations.

## **EMS Store**

The EMS store allows for distribution and no-code installation of execution apps and instruments developed in the Celonis Studio. One can use it to distribute applications and instruments privately (within your own team) or publicly on a marketplace that allows them to be sold.

## **Editions**

Celonis Snap comes in three editions: Snap, Snap+ App and Snap+ Discovery.

Snap is the free entry point to Process Mining, allowing for the analysis of a small set of data from any of the supported Source Systems by easily uploading it to Snap with the use of the Quickstarts.

Snap+ App enables a continuous analysis of a specific by syncing the source system directly to Snap+. Also, Snap+ App includes 3 Apps relevant to the chosen process. These can be installed from the EMS Store.

Snap+ Discovery increases the data limit and provides access to all the connectors and free apps from the EMS store. This allows you to sync multiple Source Systems with Snap+ to ensure that Process Discovery is as complete as possible.

The following features are available in Celonis Snap and Snap+:

## 1. Measure

FEATURES	SNAP	SNAP+ APP	SNAP+ DISCOVERY
PROCESS VISUALIZATION – VISUALLY RECONSTRUCT YOUR AS-IS PROCESS 100% OBJECTIVELY BY USING DATA FROM YOUR SOURCE SYSTEMS	✓	✓	✓
PRE-BUILT ANALYSES – GET STARTED WITH PACKAGED BEST PRACTICES FOR 25+ PROCESSES	✗	✓	✓
CUSTOM ANALYSIS CREATION	✓	✓	✓
CONFORMANCE CHECKING – PREPARE FOR AUDIT OR ASSESS PERFORMANCE AGAINST ONGOING LEAN INITIATIVES	✓	✓	✓
PROCESS REPOSITORY – EASILY REFERENCE YOUR EXISTING PROCESS MODELS AND DOCUMENTATION	✗	✓	✓

## 2. Platform

FEATURES	SNAP	SNAP+ APP	SNAP+ DISCOVERY
CELONIS COMMUNITY CUSTOMER ACCOUNT	✓	✓	✓
MANUAL FILE UPLOAD	✓	✓	✓
CONTINUOUS DATA CONNECTION	✗	✓	✓
PRE-BUILT PROCESS CONNECTORS – GET STARTED WITH ANALYSIS RIGHT AWAY. NO DATA TRANSFORMATION NECESSARY	✓	✓*	✓
		<i>Restricted to 1 connector</i>	
EVENT COLLECTION – MANAGE ALL DATA CONNECTIONS AND SCHEDULES FROM ONE PLACE	✗	✓	✓
EMS STORE – REALIZE VALUE QUICKLY WITH PRE-BUILT EXECUTION INSTRUMENTS AND APPS	✗	✓*	✓
		<i>Restricted to 3 instruments</i>
