

Shared Services Transformation

Make cutting cost cost less

What Celonis does for Centers like yours:

\$15M

In annual savings realized

SIEMENS

57%

Reduction in P2P cycle times in one year

 **TD SYNnex**

85%

Touchless invoice rate – up from 13%

Everything happening in the world means cost is king.

The business needs you to make cutting costs, cost less.

This is your time to be the hero. But the old ways are too resource heavy to work in the new reality.

Celonis transforms your Shared Services Center into an always-on value magnet that creates immediate and long-term cash

impact by delivering on the value opportunities hiding in and between your processes.

How?

Celonis layers over your existing tools and systems and:

- Shows you how your processes actually run
- Finds the hidden pockets of untapped opportunity
- Extracts that value efficiently, rapidly, continuously

Discover opportunities.
Attract value.
Extract cost.

Use Celonis to smash short-term targets and achieve long-term goals.

Celonis helps you

Reduce costs

by surfacing and eliminating common root causes behind errors and manual touches

Deliver on SLAs

through intelligent work prioritization and smart, automated workflows

Ensure compliance

by surfacing process deviations with continuous monitoring, triaging, and alerts

So you can

Impact critical KPIs

like working capital, free cash flow, and NPS

Free up your people

to have strategic impact for the business

Operate as a center of excellence

and innovation for your enterprise

DTSE — Deutsche Telekom's Shared Services Center — used Celonis to optimize their Procure-to-Pay process.

They achieved a cash discount rate of 96% and created €40M in annual savings.

Using Celonis' automation capabilities, the team

- Reached a 90% paid on-time rate
- Saved €3M by reducing duplicate payments
- Unlocked tactical savings of €12M with an improved touchless rate and 90% right-first-time rate for purchase orders.

"I was astonished when I saw what Celonis could do for the very first time. Once we had everything set up, we had this 'Wow' moment. For the first time, we saw our processes as they really are and could directly point out inefficiencies."

Peter Tasev, SVP Procure-to-Pay, DTSE
