Celonis Certification Exams

Celonis Certification Exams

General Certification Requirements:

Certified Partners need to have at least two individuals who are certified as a Sales Professional and two individuals who are certified as both an Analyst and a Data Engineer. In addition, any individuals working on a Celonis Implementation Project must be certified as either an Analyst, a Data Engineer, or both.

You become certified by completing the relevant exam with a passing grade of 80%.

Sales Professional Certification Exam Details:

- The Sales Professional Certification Exams is free-of-charge and allows for an unlimited number of attempts to pass.
- Once you start, you are allowed 1 hour to complete the exam.

Analyst and Data Engineer Certification Exam Details:

- The Analyst and Data Engineer Certification Exams each costs 200€ per person.
- Each of these purchased exams include two attempts to pass. An additional fee is required for the third and final attempt. Each exam must be taken within 90 days of purchase.
- Once you start, you are allowed 2 hours and 30 minutes to complete each exam.

You can purchase all Certification Exams directly in the training platform (https://lms.celonis.com).
Although the Certification Exams can technically be taken without doing any coursework or exercises, we do strongly suggest going through the entire Training Track to properly prepare.
Certifications are valid for a year, starting from the date you pass the exam. You must take the exam every year to maintain the certification.

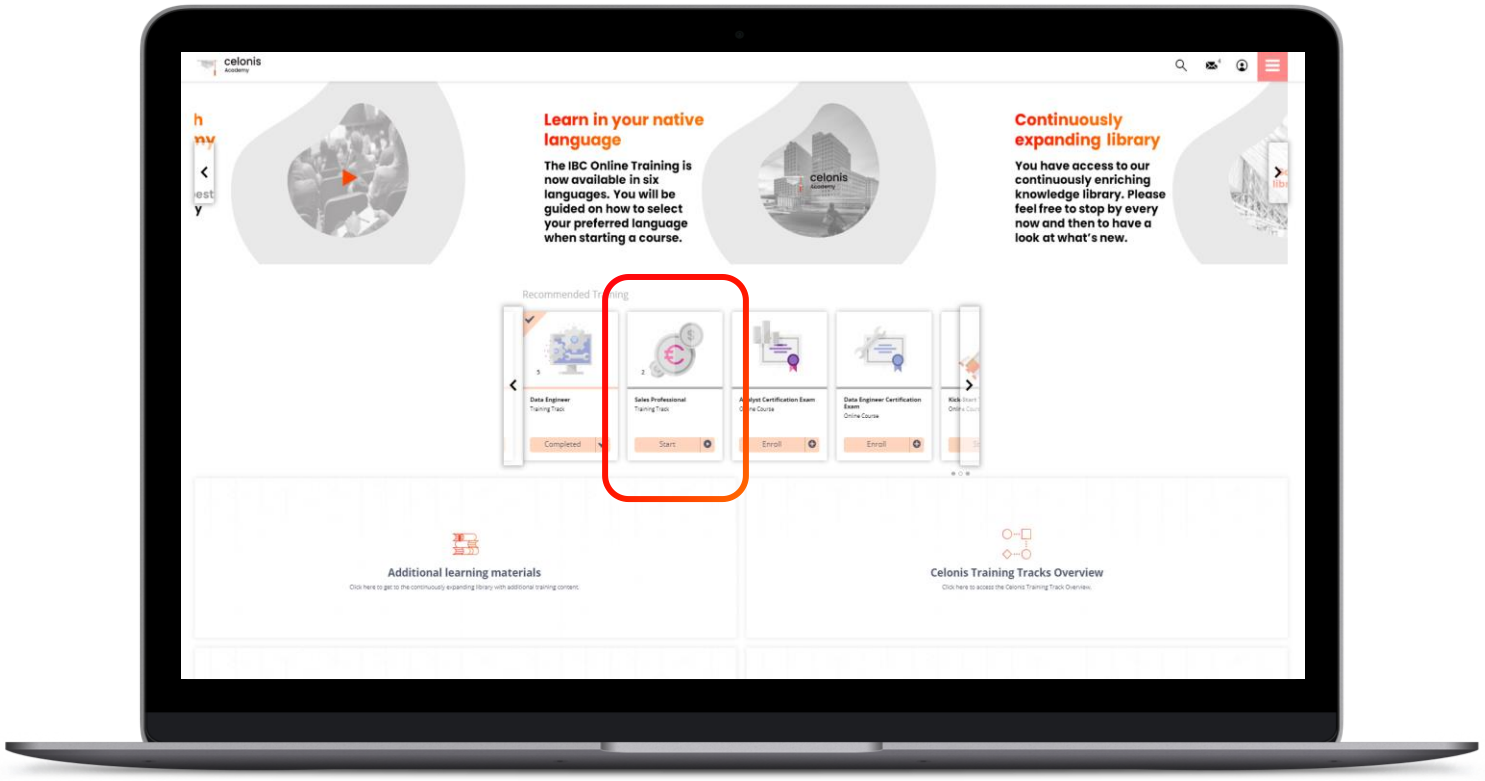
There are three Certification Exams:

Sales Professional Certification Exam

Analyst Certification Exam

Data Engineer Certification Exam

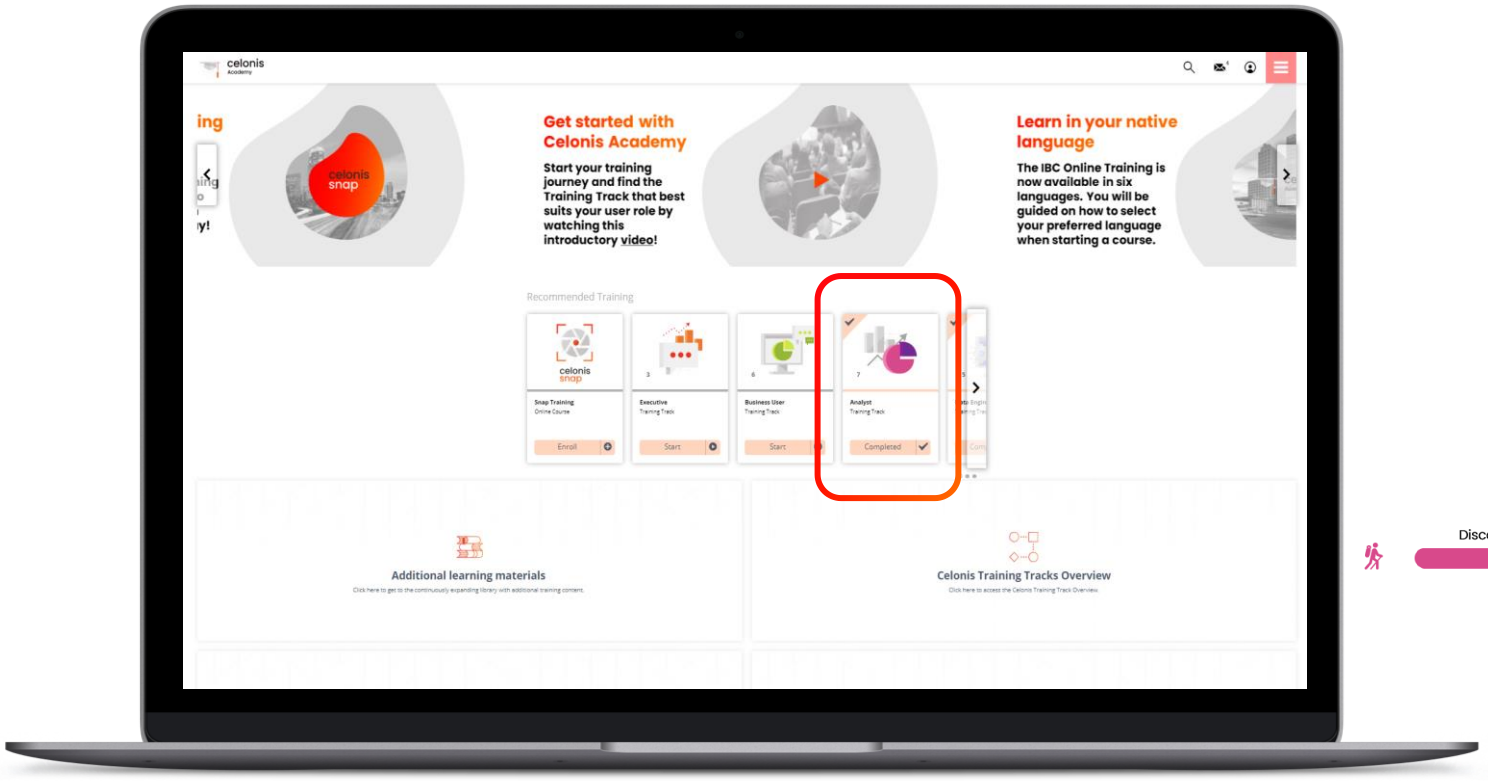
Sales Professional Certification Exam



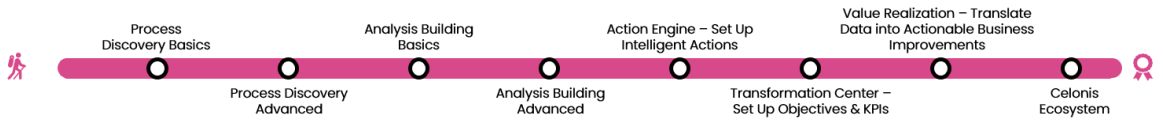
We highly recommend to complete all courses within the Sales Professional Training Track:

Starting Point Online Courses Certificate of Completion

Analyst Certification Exam

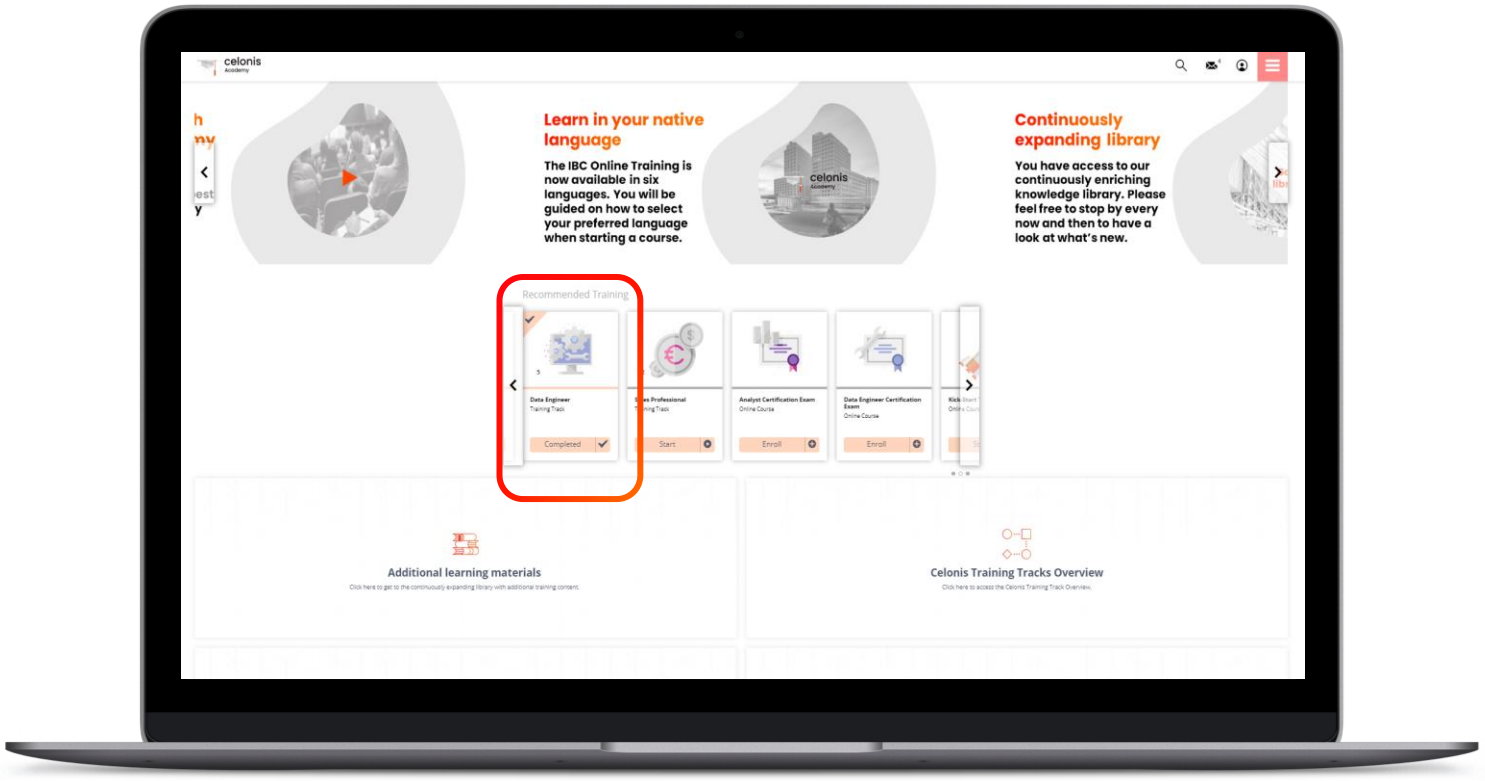


We highly recommend to complete all courses within the Analyst Training Track:



Starting Point Online Courses Certificate of Completion

Data Engineer Certification Exam



We highly recommend to complete all courses within the Data Engineer Training Track:
