Supply chain process optimization

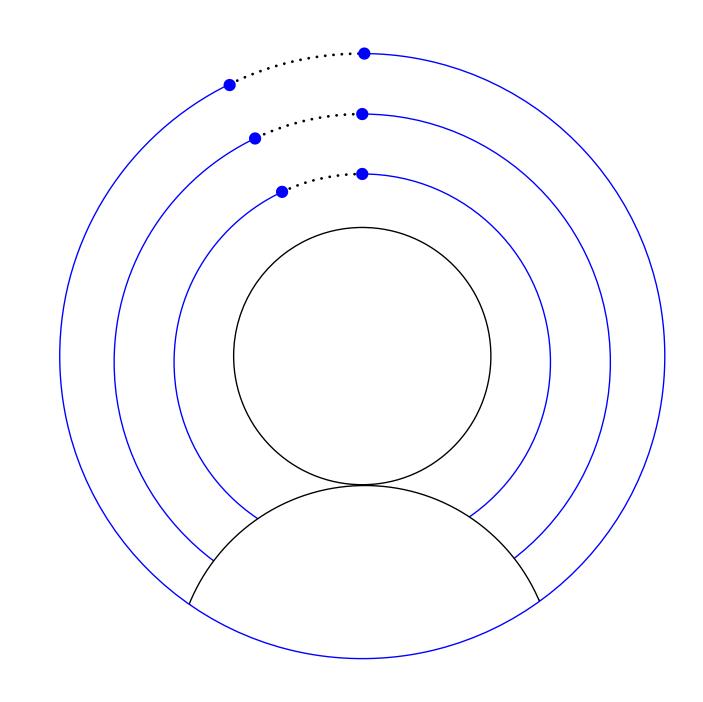

We asked 300+ global supply chain leaders about processes. Here's what they told us...

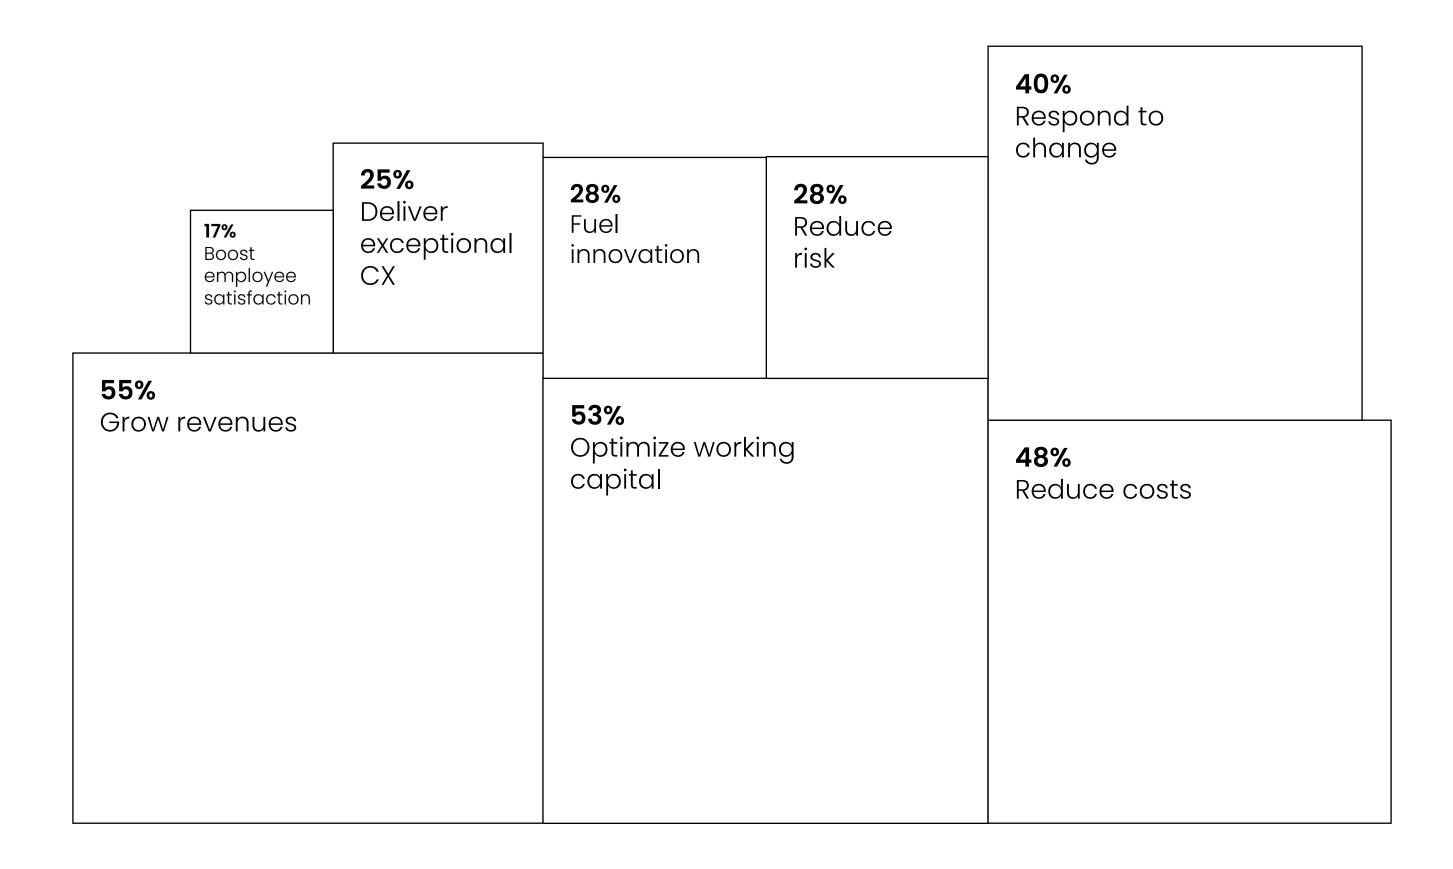

The process era is here – and supply chain leaders see the opportunity.

93% say process optimization is necessary to meet departmental objectives

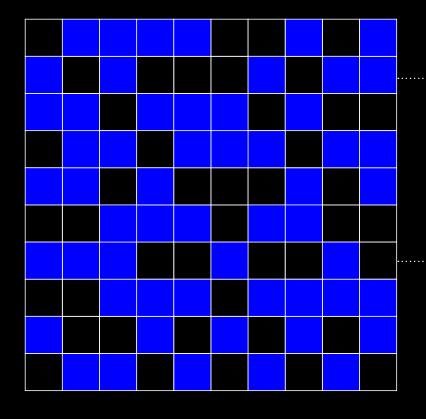

They know optimized processes help them to...

But there are still untapped process optimization opportunities.

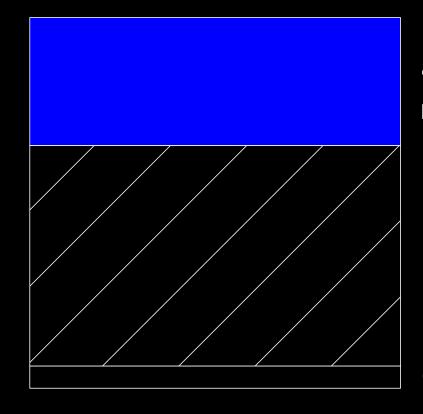

Business-critical processes within departments

56% Fully optimized

44% Sub-optimal

Cross-departmental process alignment

44% Perfectly aligned

50% Somewhat aligned

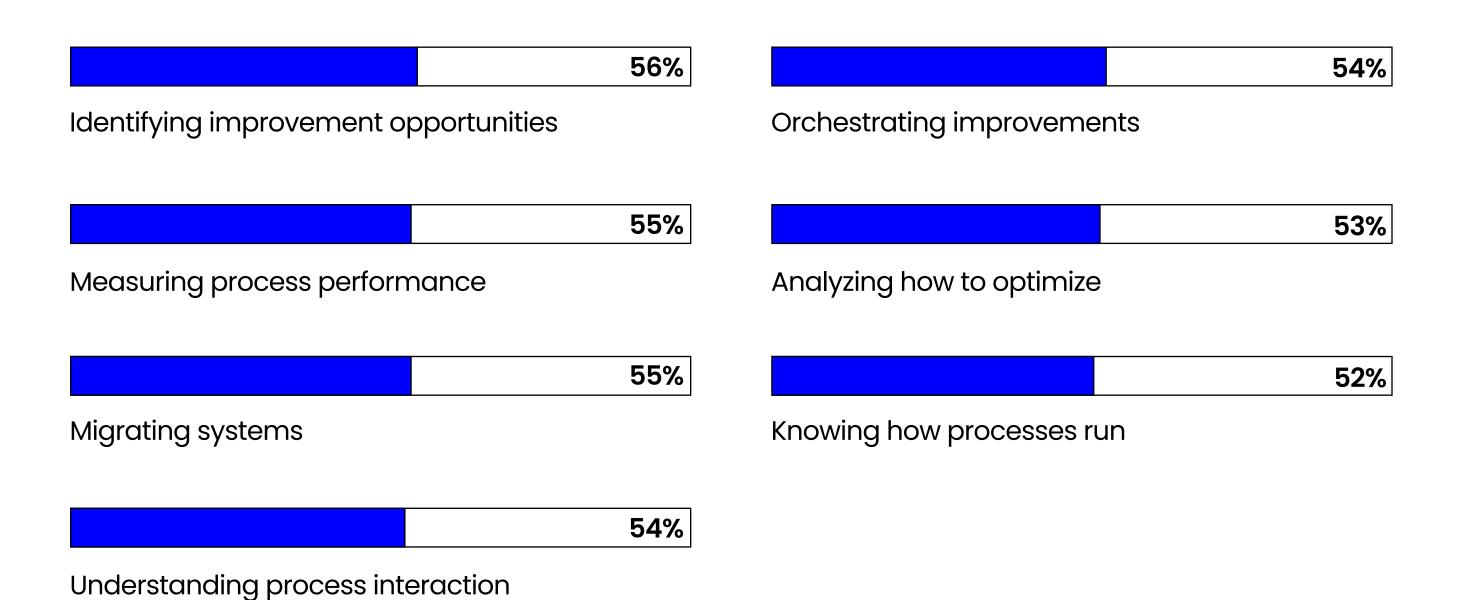

6% Not aligned

How come?

Well, almost **threequarters** (73%) say lack of visibility is the biggest enemy to process excellence.

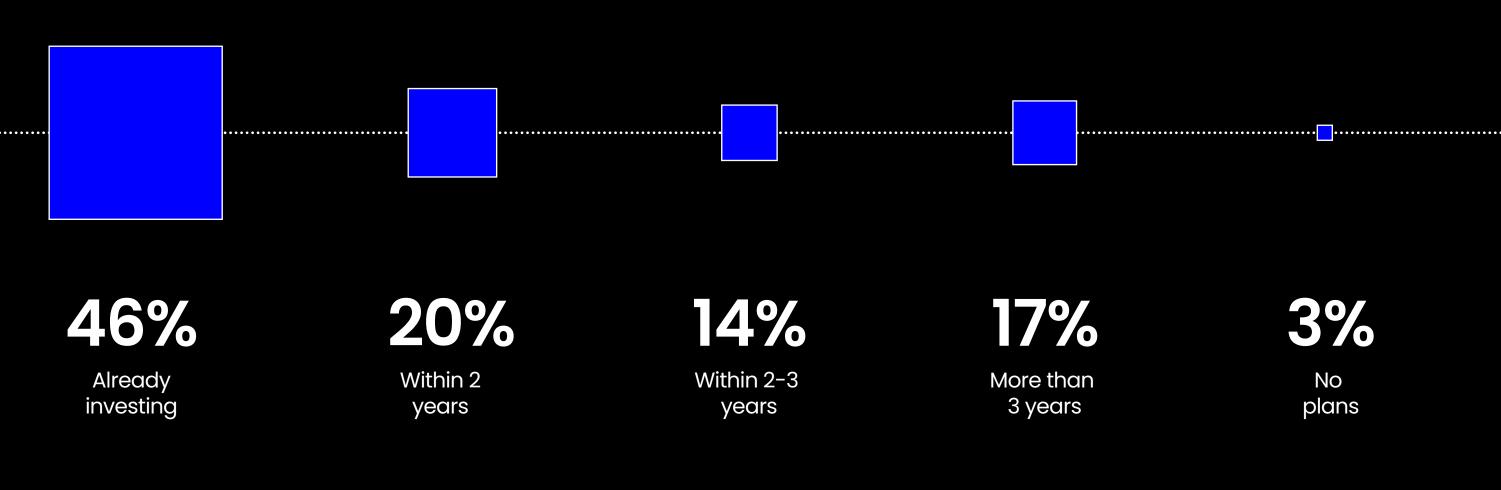

And more than half say they're up against these seven challenges.

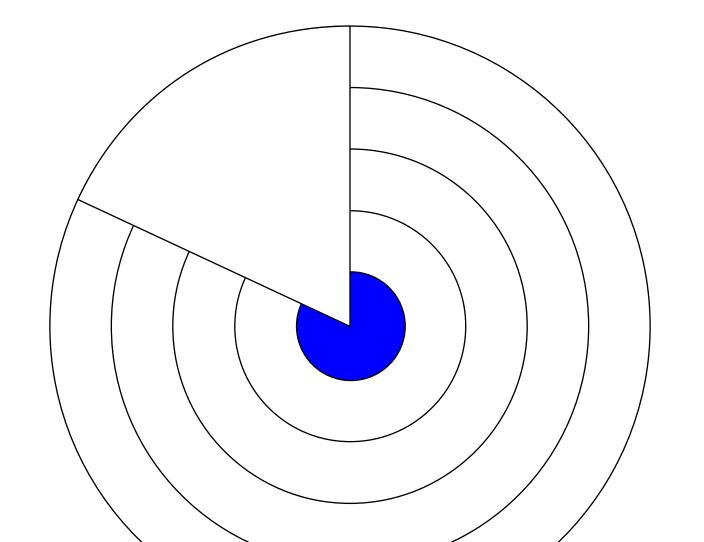

Investment in process optimization technologies is changing all that.

Timeframe for investment

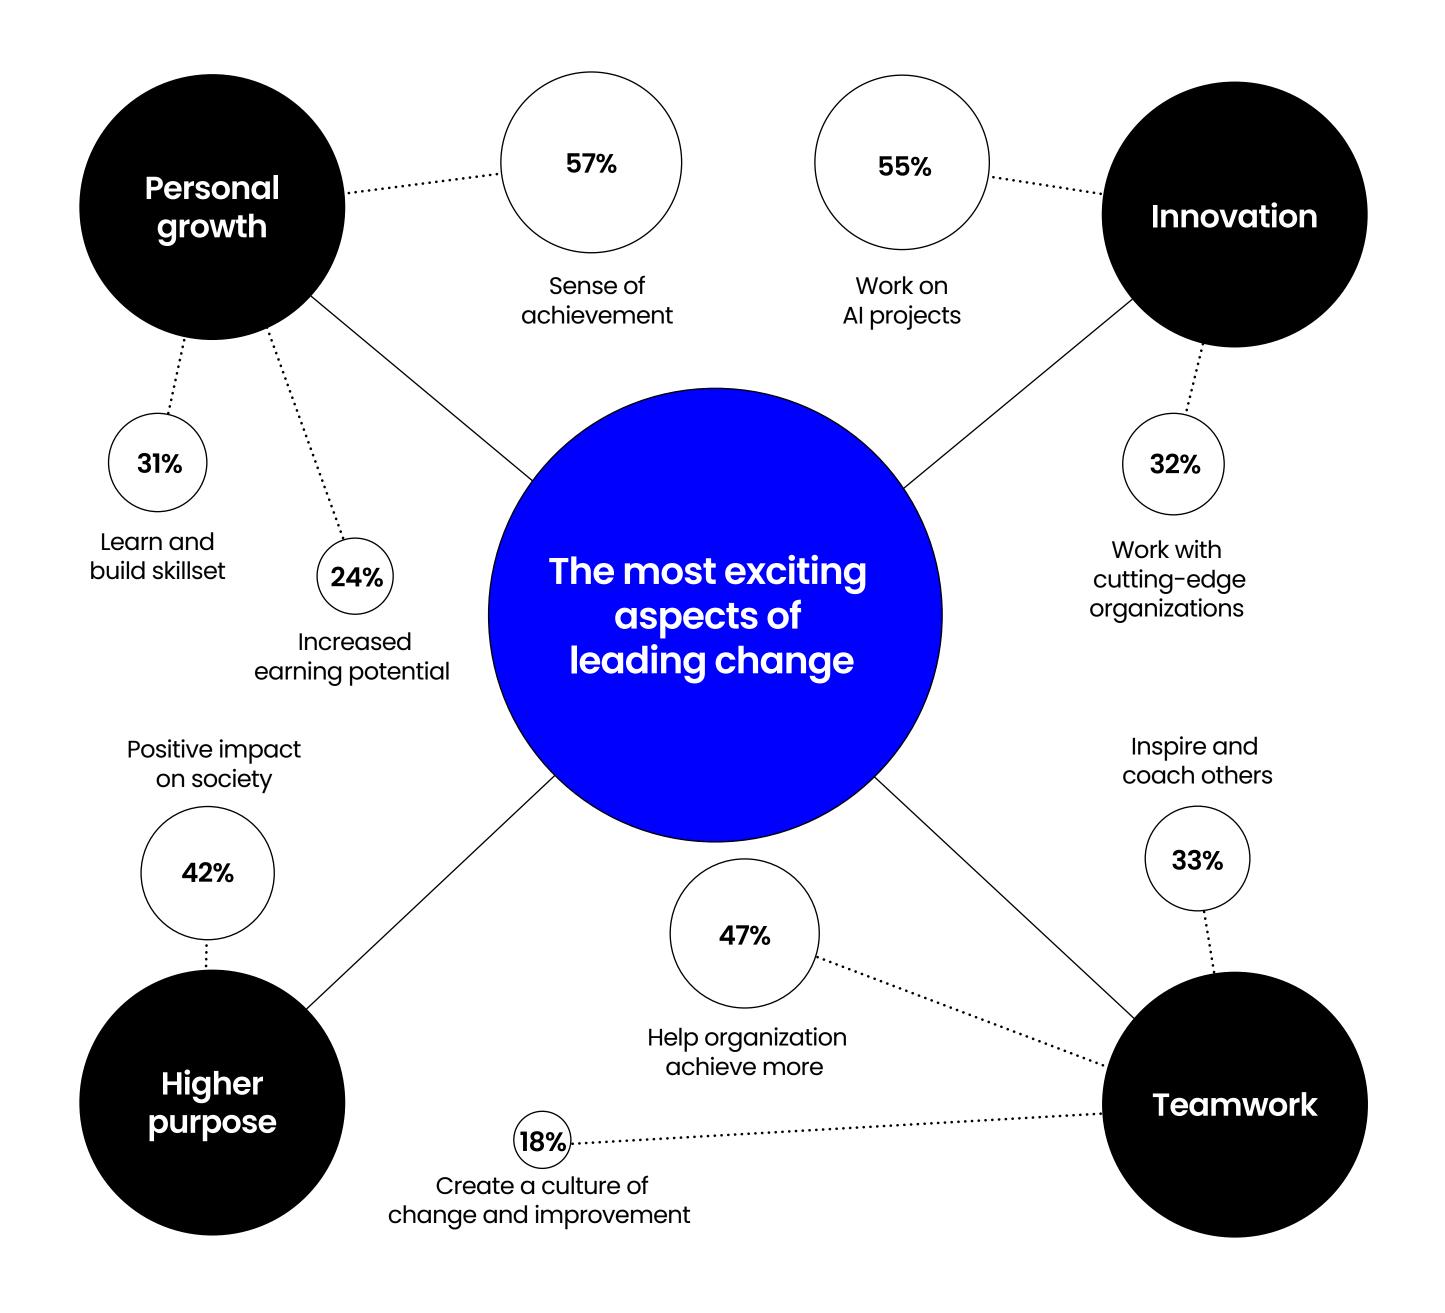

And supply chain leaders expect process excellence to go mainstream.

82% say process excellence will emerge as a core business discipline in the next five years

The supply chain function is seen as a process excellence leader.

Find out more about how supply chain leaders are optimizing their processes.
