PRODUCT DESCRIPTION:

Celonis Academy

The Celonis Academy is an online training platform that offers online courses and training tracks for various user levels, including explanatory videos, interactive tours through the software, case studies, exercises, and access to a personal training environment.
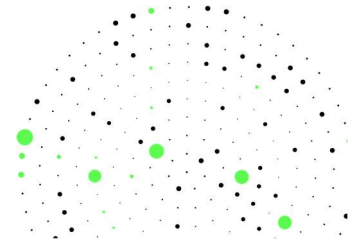

The online training offering is free-of-charge for the Celonis Execution Management System, and for unlimited users.

1.   Feature Overview

The Celonis Academy allows access to two online applications. First, by accessing Our Training Platform (https://academy.celonis.com/) the Learner can attend structured online courses with manifold explanations, interactive modules, videos, exercises, and case studies regarding the Celonis Execution Management System. Second, by logging into our Celonis Training Applications the Learner can navigate directly within the Celonis Execution Management System, complete Guided Learning Tours and work on practical exercises and check his/her progress. The following features are included:

FEATURE	DESCRIPTION
STRUCTURED TASK-BASED ONLINE TRAINING COURSES	Depending on the tasks Learners want to perform with Celonis, structured training tacks (learning paths) enable Learners step-by-step. Up-to-date Education Videos and interactive learning elements outline all key elements, functionalities and applications within Celonis Execution Management System.
CONTINUOUS PROGRESS REVIEW	The Progress Review displays the Learners current status with respect to the chosen training track.
INTERACTIVE MODULES AND EXERCISES	Interactive Modules and Exercises help the Learner to check his/her progress and understanding of the training contents. The exercises are structured with respect to the training track.

ACCESS TO CELONIS TRAINING APPLICATIONS	Access to Our Celonis Training Applications allows the Learner to not only watch the Education Videos but also work with the Celonis Execution Management System in parallel using training data in an interactive, hands-on learning experience.
PRECONFIGURED ANALYSES	Preconfigured analyses teach the Learner how to work with existing process evaluations and how to create interesting use cases.
LIMITLESS TRAINING CONSUMPTION	The Learners have no time limitations regarding their consumption of training content.
MASTERCLASSES	The Masterclass is a three-week intensive enablement class to ensure all partners master necessary skills to execute standard Celonis projects. Partners receive 360° capabilities to run pre-sales & post-sales cycles through real-life case study and Celonis coaching. The Masterclass is a prerequisite for the Celonis Reselling Program. The Celonis Masterclass may require a fee depending on the partner level.
CERTIFICATION EXAMS	These are tests designed to verify the Learner's master of a specific Celonis subject area. All Certification Exams require a fee.

2. System Requirements

The Learner can access the Celonis Academy by using a common up-to-date web browser on the Learner's personal computer, mobile device or tablet. Internet access is required.

3. Usage Information

To support the successful adoption of Celonis products and services, learning engagement data—such as course completions and Training Track completions—may be collected and tracked on an individual and on an aggregate level by Celonis, and may be shared with the Learner's employer (and/or its affiliates) at their request.

For Celonis partners, learning engagement data—such as certification completions and Training Track completions—may be collected and tracked on an individual and on an aggregate level as part of the Celonis partner program to assess partner qualifications and confirm course prerequisites are met.
