Data Sources and Process Intelligence Graph									
System Extractor	Live	/	-	/	/	×	/	/	The System Extractor is a software component that extracts data from the source system and sends it to the Celonis platform.
Manual File Upload + Data Push API	Live	/	/	/	/	/	/	/	The Data Push API is an external API that enables seamless ingestion of data in the form of files via a client into a Celonis environment. The Celonis File Upload is a software component that
Process Connector	Live				/	×	/	1	The Process Connector is a combination of extractina, connectina and transformina data for one source system.
Celonis Kafka Connector	Live		-	-	-	×		· · · · · · · · · · · · · · · · · · ·	The Celonis Kafka Connector enables Celonis customers to integrate Kafka streams of real-time, event-driven data into the Celonis platform, to support decision-making and execution.
Quickstarts	Live					×		· · · · ·	A simplified Process Connector which allows You to take a first glance at Your process information. A Quickstart includes the source data definition, typically a file upload, an included data
Data Integration	Live			,		,		,	Data Integration connects to many source systems to capture events in the form of digital footprints. Furthermore, it allows the User to transform the extracted data to construct a data may
Celonis Common Data Models Object Centric Prebuilt Transformations	Live			×	×		,	,	CCDM is an object centric and system agnostic data model defined by Celonis for standard business processes
Object Centric Prebuilt Transformations Object Centric Data Model (OCDM) Building and Editing	Live	,	,	×	×	,	,	,	Pre-built transformations for convertina source system data to standard object-centric data models.
Object Centric Data Model (OCDM) Building and Editing Perspective Editor (including Event Logs)	Live	,	,	×	×	,	,	,	In the objects & events environment you can model object types and event types and map those via transformations to raw data. You start with a set of standardized, preloaded object types
Perspective Editor (Including Event Logs) Insights Explorer (Formerly Kown as Recommended Insights)	Live	,	,	×	×	,	,	,	Construct a schema suitable for PQL-based analysis from a subset of the objects and relationships in oCCRM. Automatically generates event logs for included objects, and allows the user translationships in oCCRM. Automatically generates when the proper proper proper in the property of t
Matterna Constitutes (Continue) Kowii da Recontinuede insignia)	Live			X	X			/	instants exporer encompasses a set or process-ganostic Al capabilities aimed at surfacina insights automatically for a given knowledge model. The types of insights that are surfaced incl.
Platform Storage and Processing Capacity		,	,	,	,	,	,	,	
Protrom storage and Processing Capacity Sandbax	Live	,	,	,	,		•	•	The Celonis plotform stores and processes data subject to the limits specified in the Celonis Metrics Description for CCPM infrastructure.
Premium Sandhox	Live					Sandbox for Consultants is as	vallable based on the terms outlined	in the Partnership Agreement.	The Standard Sandbox Team serves as a testing environment for independent evaluations and testing within the limits of the defined table rows. The Standard Sandbox Team is provisioned to the standar
Premium Sandbox Platform. Team & User Management		×							The Premium Sandbox Team serves as a testing environment for independent evaluations and testing. The Premium Sandbox Team is only available as a separate Order at an extra charge
	Live		-	-	-	-	/	-	The platform administration is a set of capabilities and administrative controls that correspond to all aspects of the Celonis platform, including deployment settings & configuration, licensi
Integration with SSO (Federated identity) Application Keys	Live		-	-		-	-	· · · · · · · · · · · · · · · · · · ·	By connecting your company's authentication mechanism, your users can log in to your Celonis platform with their existing access credentials. SSO configuration reduces manual account
Application Keys Team Security & Privacy	Live								Application Keys are used to authenticate scripts and applications.
Adoption Tracking (User Adoption Data)	Live			1	- 1		,		The Team Security & Privacy is defining which User is capable of sharing and accessing the content in the platform. A Two Factor Authentication enforces users to validate their identity via
Adoption Fracking (User Adoption Data) Process Analysis	Live	,	/	,	/	/	/	/	Monitoring user behavior with adoption tracking allows the admin to see how often users access the team and what content they access within Studio. This allows the admin to understance
Celonis Studio, Apps & Experiences		,	,	,	,	,	,	,	
Packages	Live						,	,	The Celonis Studio is where analysts install and customise apps from the Marketplace or create, test and edit their own apps, dashboards and actions. A few building blocks to analyse and
Shared Machine Learning Workbench	Live	,	,	,	,	,	,	,	Packages are the main structural element in the Celonis Studio and contain collections of assets that interact with each other to cenerate an app. Within packages the user can read to a Machine Learning (1) provides other Celonis Products such as Celonis Studio. Action Flows, or open application framework applications, and analytics data including predictions.
