

# Availability of our products

The regulations with respect to the import of medicines differ from country to country.

Within the European Union, licensed medicines can often be imported without special import permits. Even when the product is not licensed in the receiving country. Outside of the European Union a product specific permit can apply. For medicines that are not licensed in the country of origin additional rules apply.

Ace has a lot of experience with the supply of her products outside the Netherlands. Please contact us through our contact form for more information on the availability of our medicines, we are happy to look into your specific request and advise which steps to take.

Ace Pharmaceuticals is not allowed to deliver directly to a patient. Please ask your local pharmacy for assistance if you require a specific medicine.
