

Hello,

I am in the process of establishing a Code Club, a free club in our local community where young people learn about programming and digital making, and I was wondering if your organisation can offer support.

What is Code Club?

Code Club is a global network of coding clubs where young people develop skills and confidence to become digital tech creators. It's part of **the Raspberry Pi Foundation** — a UK-based charity with the mission to enable young people to realise their full potential through the power of computing and digital technologies.

At Code Clubs, young people learn to code, build websites, create apps and games, and explore technology in an informal, creative, and social environment. They also have the opportunity to develop important life skills such as communication and critical thinking. You can find out more at codeclub.org.

How you can support us

Code Clubs rely on the generous support of the communities in which they run. They are free to attend and many of the mentors who run them are volunteers. As such, we are reaching out to you in the hope that you will help us to

There are several ways

can support

- In-kind contribution: For example, allowing the use of your facility to host our Code Club, or donating old equipment
- Fiscal support: A monetary donation to cover specific or general club costs (e.g. to cover insurance costs)
- Provision of volunteers with technical skills (mentors): To assist the young people during club sessions

By supporting _____ you'll be enriching your local community while contributing to a growing global movement to help young people become digital creators. You'll also be able to reference your support in your newsletters, publications, and reports.

Thank you for taking the time to read this. If you're interested in getting involved and supporting our Code Club, please contact me at _____

Kind regards,

Club leader,
