How to use our progress charts

We have developed a series of progress charts based on our '3…2…1…Make!' project paths, to help celebrate learners' coding achievements.

Our progress charts are available for three project paths:

- [Introduction to Scratch](#)
- [Introduction to web](#)
- [Introduction to Python](#)
- [Introduction to micro:bit](#)

The progress charts have been designed as colouring sheets, and we have also created downloadable stickers for each progress chart, which you can print to use in your Code Club.

When coders complete a project, they can colour in the badges or add a sticker to their progress chart to celebrate what they have created!

Stickers

Avery sticker sheets

If you have access to [Avery 35mm round labels](#), you can use our Avery sticker sheets to easily print your stickers.

Microsoft Word sticker sheets

If you would like to use a different template to print your stickers, you can use our Microsoft Word sticker sheets to copy and paste the stickers.
