

Manage operational exchanges with Teréga

Exchange platform and sites

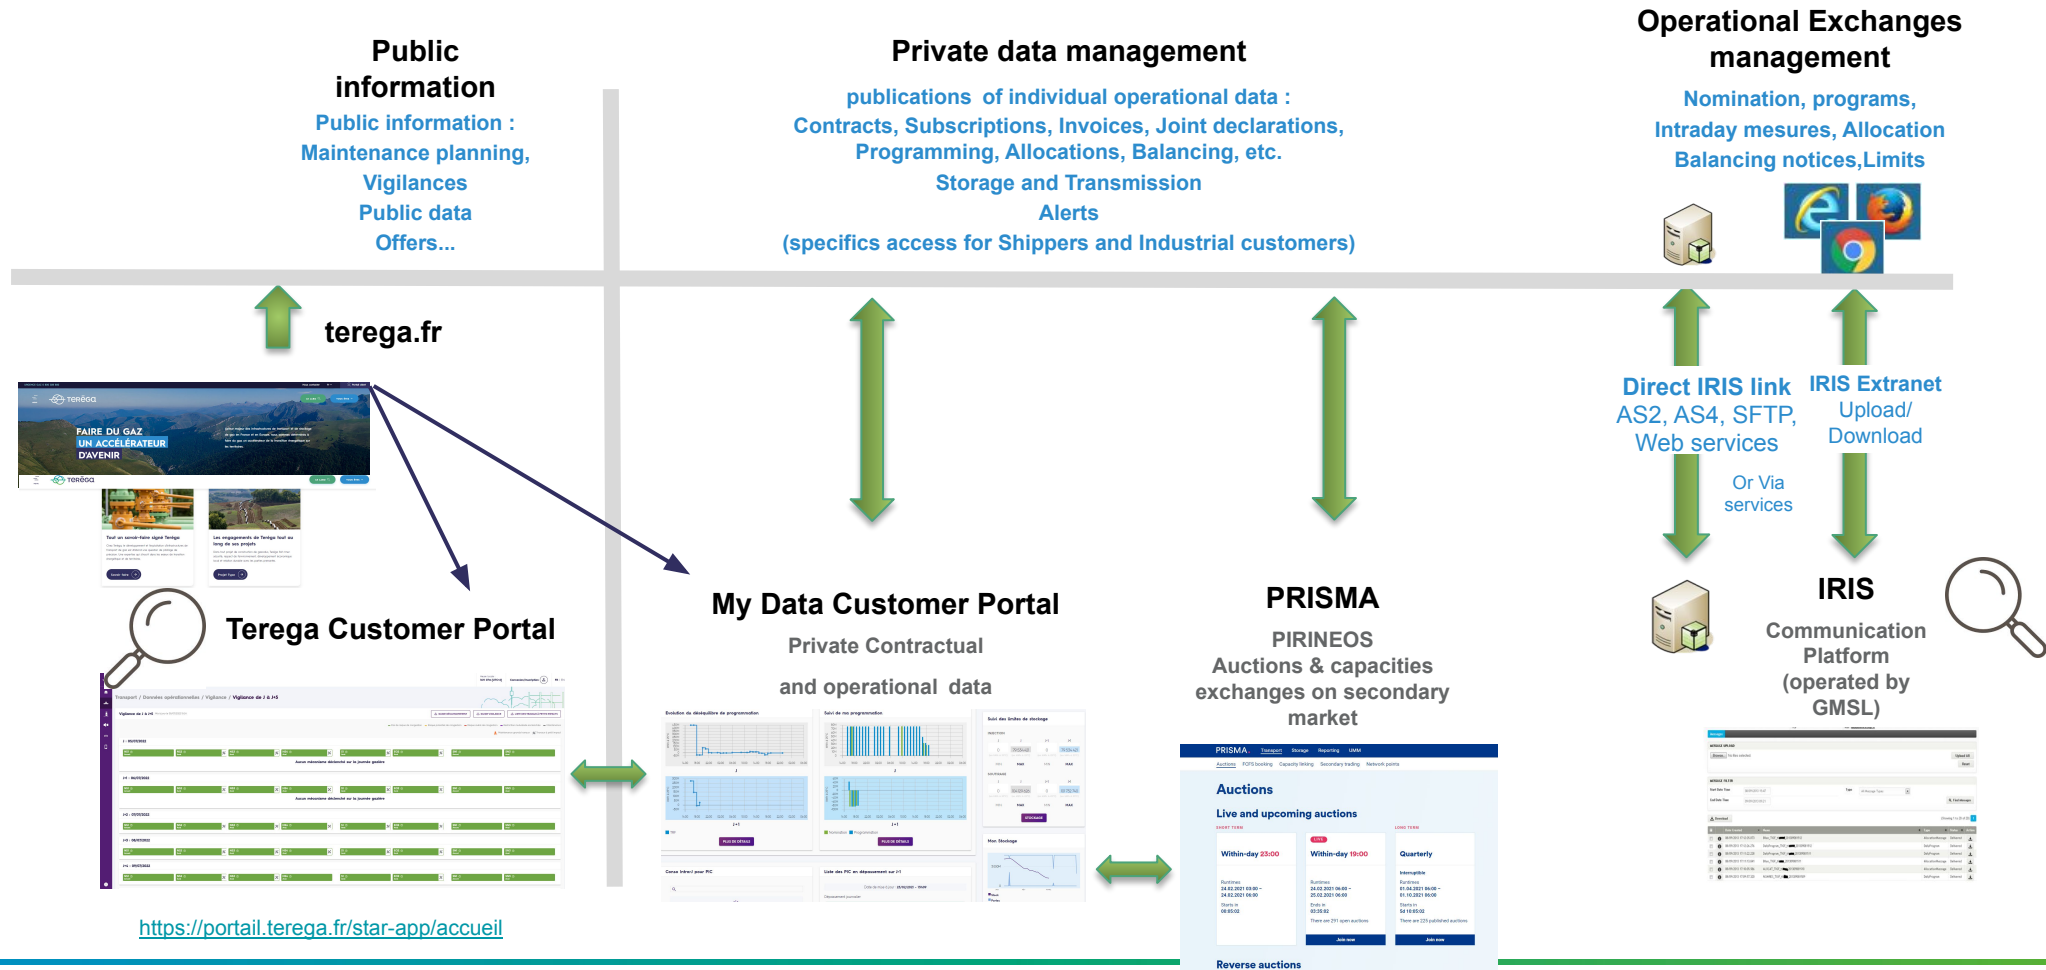

Manage operational exchanges with Teréga step by step

Tools : **Portals :** Public and private data publications, subscription portal
IRIS : Exchange platform (nomination, programs...)

Organisation between Information System tools

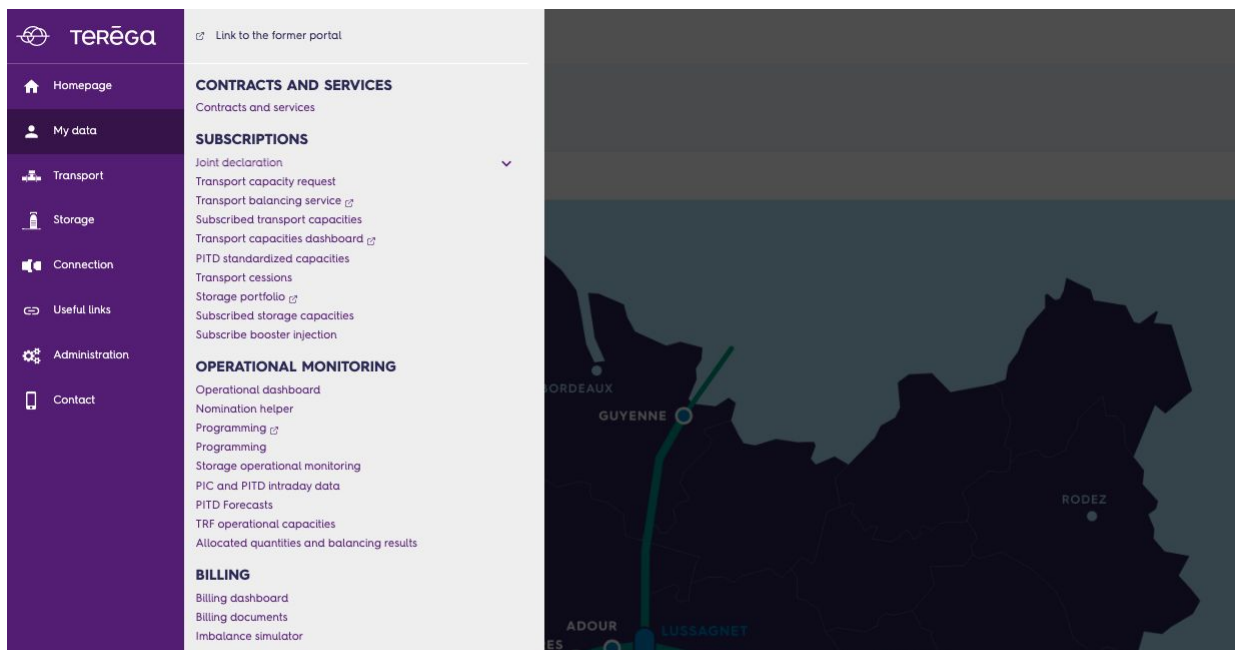

Portal and data access

On our portal : <https://portail.terega.fr/star-app/accueil>

you can find :

- **Private access** for your :
 - Subscriptions
 - Storage auctions
 - Access to private and public data for daily operations.
 - Publications related to your capacities, programs, balancing and allocations.
- **Operational tools**

Back Office is in charge to provide you with **Portal access**
contact : backoffice@terega.fr

Our Portal is developed in an agile elaboration mode, we work on its continuous improvement and evolutions which are delivered regularly.

- Nominating on the portal is a feature planned in a future evolution but does not exist yet.
- API will be made available as they are being developed.

IRIS communication platform : how to access ?

For your nominations you have to exchange via IRIS

Our document “**Shipper Connection Processing**” describes :

- each file, its usage, its content, and its available formats
- available communication modes (AS2 - AS4, SFTP, Extranet..).

1. Request this document from our IT Team
2. Choose your format and communication mode and exchange with our IT Team to implement them.

Files	available Formats on IRIS
Nomination	Edigas 4 - Edigas 5 - specific XML
Program	Edigas 4 - Edigas 5 - specific XML - CSV
Limits	Edigas 5 - specific XML - CSV
Allocations	Edigas 4 - Edigas 5 - specific XML - CSV
PIC Overrun	CSV
