

Pau, 10 March 2022

PRESS RELEASE

To make renewable gas an accelerator of the energy transition, Teréga is taking part in the Assises du Produire en France and the Made in France Nouvelle-Aquitaine trade fair

In 10 years, the Made in France trade fair has become an unmissable event, and this year it is heading off into the regions, with Nouvelle-Aquitaine as its starting point. As a partner of the event taking place this weekend in Bordeaux, Teréga can use it to showcase its industrial expertise, its environmental innovations, and its contribution to the economic expansion of territories in the South West. The fair will take place at the same time and in the same place as the 5th Assises du Produire en France, where eight presidential election candidates are expected to take part in a major debate about French reindustrialisation and manufacturing.

"It is with tremendous pride that Teréga's teams will be a part of the Made in France fair, and the Assises de Produire en France, both of which provide a shop window to the nation for our expertise and reflect our contribution to the region's industrial excellence and ecological transition. Once again, our presence at these big events reaffirms Teréga's ambition to make renewable gas an accelerator of the energy transition: this is gas 'made in Nouvelle-Aquitaine'!", **says Dominique Mockly – Chairman and CEO of Teréga.**

Meet Teréga on Friday 11 March at the Assises du Produire en France

On Friday 11 March, Teréga will take part in the Assises du Produire en France, an exceptional event devoted to upholding French products, jobs, services and know-how. This year sees more people involved than ever before, with more than 500 business leaders, business creators, experts and institutional figures expected to attend this event which will allow those who believe in industrial renewal and the preservation of our expertise to meet and talk with one another. The aim is to send out a strong, optimistic signal to all our entrepreneurs, who daily take on new challenges to defend French manufacturing in these times of economic crisis.

More information: <https://www.assisesduproduireenfrance.fr/>

Teréga is a partner of the MIF Nouvelle Aquitaine trade fair, taking place from 11 to 13 March at the Palais des Congrès in Bordeaux.

Since 2012, the Made in France trade fair has provided a shop window for French industry and its innovations, but it has also been the ideal setting for meetings between economic stakeholders in the region, the general public, journalists and politicians.

This first territory-based event, with free entry for all, will also provide an opportunity for 10,000

visitors to come and meet a hundred or so businesses, including Teréga, and to discover the advantages of a major territorial stakeholder in the energy sector, which for 75 years has deployed its exceptional expertise in developing and operating gas transport and storage infrastructures.

Teréga will turn the spotlight on its support for green gases, such as the development of methanisation, the roll-out of the hydrogen industry, and the multi-energy and digital services developed by its subsidiary, Teréga Solutions, to maximise energy efficiency. Produced locally by the repurposing of waste, methanisation actually helps build a renewable, decentralised energy mix, at the same time encouraging the economic development of the territories. The refinement of hydrogen solutions, powerful tools for greening certain industries which are hard to decarbonise, will also become a factor in greater competitiveness and significant economic dynamism in the local industrial fabric.

Find Teréga on stands D02 and D03 at the MIF Expo Bordeaux trade fair, at the Palais des Congrès from 11 to 13 March 2022.

About Teréga

Established in South-West France, at the crossroads between major European gas flows, Teréga has exercised exceptional expertise for over 70 years in the development of gas transport and storage infrastructures. Today, it continues to develop innovative solutions to overcome the major energy challenges facing France and Europe. A true accelerator of the energy transition, Teréga operates over 5,000 km of pipelines and 2 underground storage reservoirs representing 16% of the French gas transport network and 24% of national storage capacities. In 2020, the company generated revenues of €460 million and it has more than 660 employees.

About the Made in France trade fair

The Made in France trade fair, created by Fabienne Delahaye, has in 10 years become an essential Parisian event, a place to discover the expertise of the businesses that manufacture in France. Bolstered by that success, and for the very first time, MIF Expo is developing regional events, the first stage taking place in the Nouvelle-Aquitaine region from 11 to 13 March 2022. More than 10,000 visitors are expected by the 130 businesses who will be present at the Palais des Congrès in Bordeaux, half of which are based in the region.
