PRESS RELEASE

COVID-19: Teréga deploys its Business Continuity Plan

Following the containment measures announced on Monday 16 March by the President of the Republic in an attempt to stem the spread of the COVID-19 epidemic, Dominique Mockly, Chief Executive Officer, announced today that the Business Continuity Plan has been deployed. This plan, which has been prepared over a few weeks, allows the company to continue supplying gas, sustainably and despite the epidemic, while adapting its operating methods to government directives.

"The continuity of our general interest mission under the best, most reliable conditions possible, as well as the safety of all our employees are our top priorities. In light of the current conditions, we must modify the way we operate to adapt to government directives as regards containment and the protection of our employees and partners, all while sustainably maintaining the essential functions of the company. These guarantee the delivery and storage of gas for our customers. This temporary organisation, on which the company will rely during the entire Covid-19 crisis, has now been put in place."

Dominique Mockly - CEO of Teréga

The Business Continuity Plan is based on the appropriate mobilisation of field teams who are unable to carry out their functions via remote working, and on a refocusing of operations around the company's essential activities. It also allows functions such as accounting, purchasing, IT services, etc. to continue to operate efficiently while the majority of employees are working from home.

Teréga will remain in constant contact with the authorities as well as with other gas network operators, specifically GRTgaz in France and ENAGAS in Spain, in order to ensure the proper functioning of gas networks, in particular at connection points.

About Teréga

Established in South-West France, at the crossroads between major European gas flows, Teréga has shared exceptional know-how for over 70 years in the development of gas transport and storage infrastructure. Today, it continues to develop innovative solutions to overcome the major energy challenges facing France and Europe. A true accelerator of the energy transition, Teréga operates over 5,000 km of pipelines and 2 underground storage reservoirs representing 15,6% of the French gas transport network and 24,5% of national storage capacities. In 2018, the company generated revenues of €476 million and had more than 600 employees.
